

CONCELEX

Building Excellence

BRIEF HISTORY

- CONCELEX was founded in 1994 as a private, family-owned General Contractor.
- Based in Bucharest, Romania, the company provides fully integrated construction services for both public institutional and private beneficiaries.
- CONCELEX operates countrywide, as well as in other EU countries, such as Germany and Austria.
- As the first carbon-neutral general contractor in Romania, CONCELEX has proven itself to be responsibility-oriented.
- The company dynamically and effectively manages the specific projects, by paying increased attention to innovative elements. All these advantages contribute to creating CONCELEX identity, by delivering each work at a top standard and within an optimum timeframe.
- A multidisciplinary team exceeding 3,000 employees (incl. sub-contractors).
- 30+ years of know-how in Romania and beyond.

CONCELEX Ecosystem

A fully integrated General Contractor, delivering high-stakes projects with precision and excellence

Building Excellence

SERVICES & AREAS OF EXPERTISE

CONCELEX is committed to delivering reliable and seamless solutions that pave the way for a sustainable future.

Our expertise spans various sectors, ensuring that we meet the diverse needs of our clients while adhering to the highest standards of quality and innovation.

Buildings

Civil Engineering

Infrastructure

Energy

Special Projects

CONCELEX SERVICES

Buildings

We provide comprehensive "design & build" solutions for all types of projects, including shopping centers, residential developments, work areas, industrial sites, and educational facilities.

Our expertise covers every construction stage, backed by a skilled workforce, innovative approaches, and high-performance equipment.

We partner with institutional companies, real estate developers, private equity funds, and public entities to support investment plans and ensure success.

Civil Engineering

With an expertise in the construction of protective structures, retaining walls, water purifying or treatment plants or industrial buildings, CONCELEX provides design, engineering and construction services at the highest standards.

We provide civil engineering services nationwide, by assigning specialized technical and management teams that can provide "turnkey" solutions for every project.

For us, civil engineering means having the capacity of thoroughly managing large-scale projects, while seeing the big picture, as required for such works.

Infrastructure

Whether it's road, rail, or airport infrastructure, or stadiums and swimming pools, our expert teams ensure each project stays on time and within budget. By working closely together, they support progress and economic development.

Our project managers bring extensive experience and practical knowledge, effectively managing large-scale infrastructure projects and anticipating potential challenges.

Energy

In the energy sector, we modernize infrastructure for cooling towers, nuclear facilities, and electrolysis plants with meticulous attention to detail.

CONCELEX built the only hyperbolic cooling tower in Romania in recent years, and we partner with major energy providers like Nuclearelectrica on projects nationwide.

We leverage our top assets—engineering expertise, skilled workforce, and high-quality execution—by setting clear goals, closely managing each project, and swiftly addressing any issues.

Special Projects

Our Special Projects Division, created in response to construction digitalization, emerging technologies, and client demands, delivers turnkey solutions for unique projects.

Leveraging our engineers' and architects' expertise, we manage every aspect of airport, hydrotechnical, maritime, military, and energy projects, from design to execution, with a focus on advanced technologies and unique requirements.

CONCELEX TEAM

Only flexible teams built on values can deliver durable constructions.

CONCELEX is managed by a steering committee which is responsible for both obtaining financial turnover and creating an efficient, competitive organization.

Our philosophy is based on respect, responsibility, and commitment to sustainable development.
